

1 What is the purpose of the "Data/Model" view in Power BI?

The **Data/Model view** in Power BI is used to **inspect your data and build the logical data model** that drives your reports. Without a well-structured model, your visuals and measures may return wrong results or perform poorly

13 Troubleshoot: Slicers not affecting all visuals—how to fix?

To fix slicers not affecting all visuals:

1. Verify relationships are correct.
2. Use **Edit Interactions** to ensure slicer applies to visuals.
3. Ensure the slicer field is linked to the visual's table.
4. Check if DAX measures override filters.
